

PAPER WEAVING BOOKMARK

1. Choose either the beginner's pattern on the left or the advanced pattern on the right. Either transfer the pattern to your good paper, tape the pattern on top of your good paper or use the pattern for your finished bookmark.
2. Cut on all the solid lines. Note that on the beginner's pattern the complete v is removed at the top and on the advanced pattern the top two v's are removed.
3. Fold all the v's towards the top.
4. Starting with the bottom v, tuck the tip under the notch created by the v above as indicated in the diagram. Repeat for the remaining v's.
5. Use a glue stick or a little white glue to anchor the tips or glue the completed paper weaving to a background paper. Add embellishments or ribbons as desired.
